

PARAS DESHPANDE

Pune, India | +91 8788644033 | paraspdeshpande@gmail.com

EDUCATION

B.E. in Artificial Intelligence & Machine Learning

Savitribai Phule Pune University

CGPA: 8.0

June 2025

TECHNICAL SKILLS

- **AI/LLM & Frameworks:** Prompt Engineering, RAG Pipelines, Embeddings, NLP, LangChain, LangGraph, Pydantic AI, ADK
- **Models:** OpenAI, Claude, Gemini, Mistral, LLaMA
- **Languages & Tools:** Python, HTML, CSS, Streamlit, FastAPI, Docker, Linux, Excel, Power BI, Langflow, n8n, Make
- **Databases & Vector Search:** SQL, PostgreSQL, MongoDB, Redis, ChromaDB, FAISS, Pinecone, GCP Vector Search
- **Protocols & APIs:** REST, gRPC, WebSockets, OAuth2, OpenAPI, MCP, A2A, API Integration

PROFESSIONAL EXPERIENCE

AI Product Engineer (Apprentice)

Amber, Pune | Feb 2026 – Present

- **User Journey Optimization:** Evaluated 500+ AI chatbot conversations to identify intent mismatches, conversational failures, and escalation gaps across diverse user paths.
- **CSAT Growth:** Contributed to chatbot optimization initiatives that raised CSAT from ~40–50% to ~50–60% through structured conversation analysis and refined escalation flows.
- **Product Validation:** Collaborated cross-functionally with Product, QA, and Engineering teams to test, validate, and sign off on 5–6 AI feature and workflow releases prior to production deployment.
- **Prompt & Knowledge Engineering:** Assisted in prompt refinement, contextual knowledge base updates, and release validation using LangSmith and Claude.
- **Operational Automation:** Developed an automated booking form POC that reduced human agent manual processing time by 4–8 minutes per ideal scenario.
- **Analytics & Stakeholder Reporting:** Authored release notes, analytical reports, and operational documentation using SQL, Metabase, Excel, and Notion.
- **Cross-Functional Support:** Worked closely with operations teams to resolve critical chatbot support issues and continuously improve AI-assisted support workflows.

Data Scientist (Internship)

Geta.AI Labs Pvt Ltd, Pune | Jun 2025 – Sept 2025

- **Pipeline Architecture:** Engineered multi-LLM RAG pipelines utilizing OpenAI, Claude, Gemini, and LLaMA, boosting retrieval quality by 40%.
- **Backend Development:** Developed production-grade conversational systems using LangChain, ChromaDB, PostgreSQL, Redis, and MongoDB.
- **Deployment & Latency Optimization:** Deployed a modular FastAPI and Streamlit architecture delivering sub-200ms API latency alongside automated JSON logging.
- **System Integration:** Integrated external APIs to enable highly scalable, context-aware conversational ecosystems.

PROJECTS

AI-Powered Business Analytics Dashboard

Python, FastAPI, Streamlit, Scikit-learn, TF-IDF, Prophet

- Built predictive business models achieving 89% accuracy for Churn prediction, 85% for Sentiment analysis, and a 7.4% MAPE for Sales Forecasting.
- Delivered real-time data insights via a seamless FastAPI-Streamlit integration with sub-200ms response times.

RAG Chatbot

Python, FastAPI, LangChain, Ollama, ChromaDB

- Achieved 92% retrieval accuracy by implementing semantic chunking and custom embeddings.
- Realized a 55% reduction in model hallucinations and improved response latency by 40%.
- Designed and engineered a frontend supporting real-time PDF ingestion and automated knowledge base generation.

Sales Insights Dashboard

Power BI, DAX, Power Query

- Developed dynamic KPIs and a forecasting model (R^2 : 0.88) to drive high-level management and strategic decisions.
- Identified sales representative performance gaps, highlighting individuals with a >15% variance from targets.

CERTIFICATIONS

- Python for Everybody – University of Michigan
- AWS Data Analytics, AI/ML
- Git & GitHub – Microsoft
